

Introducing the New EZ Fill Canister For T-Flex™ Coin Dispensers

Building on years of innovation and market intelligence, CPI has designed a new canister for the ever popular T-Flex Coin Dispenser. We listened to market requests for improvements and have implemented these in our best canister design to date.

The EZ Fill Canister offers the following benefits:

- **Faster to fill than the previous version**
- **Easier to load coin**
- **Re-designed calibration strips are easier than ever to read**
- **Front mounted calibration strips allow for faster viewing of coin amount**
- **Light in weight but sturdy in design**

FEATURE	BENEFIT
Fast to fill the canister	Saves labor time filling coin
Easy to load coin	Easy to load loose coins
	Easy to train new hires
	Easy to fit for all hand sizes
	Effortless to open and close the cover
Calibration strips are easily visible & easy to read	No need to remove the canister from the base
	No need to remove the cover to see the total balance in each column
Light to carry	Fewer dropped canisters
Black back plate design won't show dirt and grime	Looks cleaner and sleeker

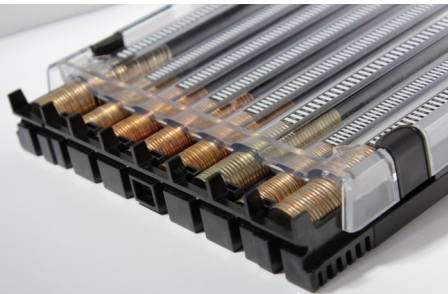

**PAYMENT
INNOVATIONS**

Load in Lane feature allows for topping of the canister through the holes in the top during transactions, if required

Front calibration strips allow you to easily see the value in each column of the canister

Depressible tabs allow for easy removal of cover

Wide coin slots allow for coin to easily be loaded

**Available for US only*
